

Welcome to TADAML 2025 workshop

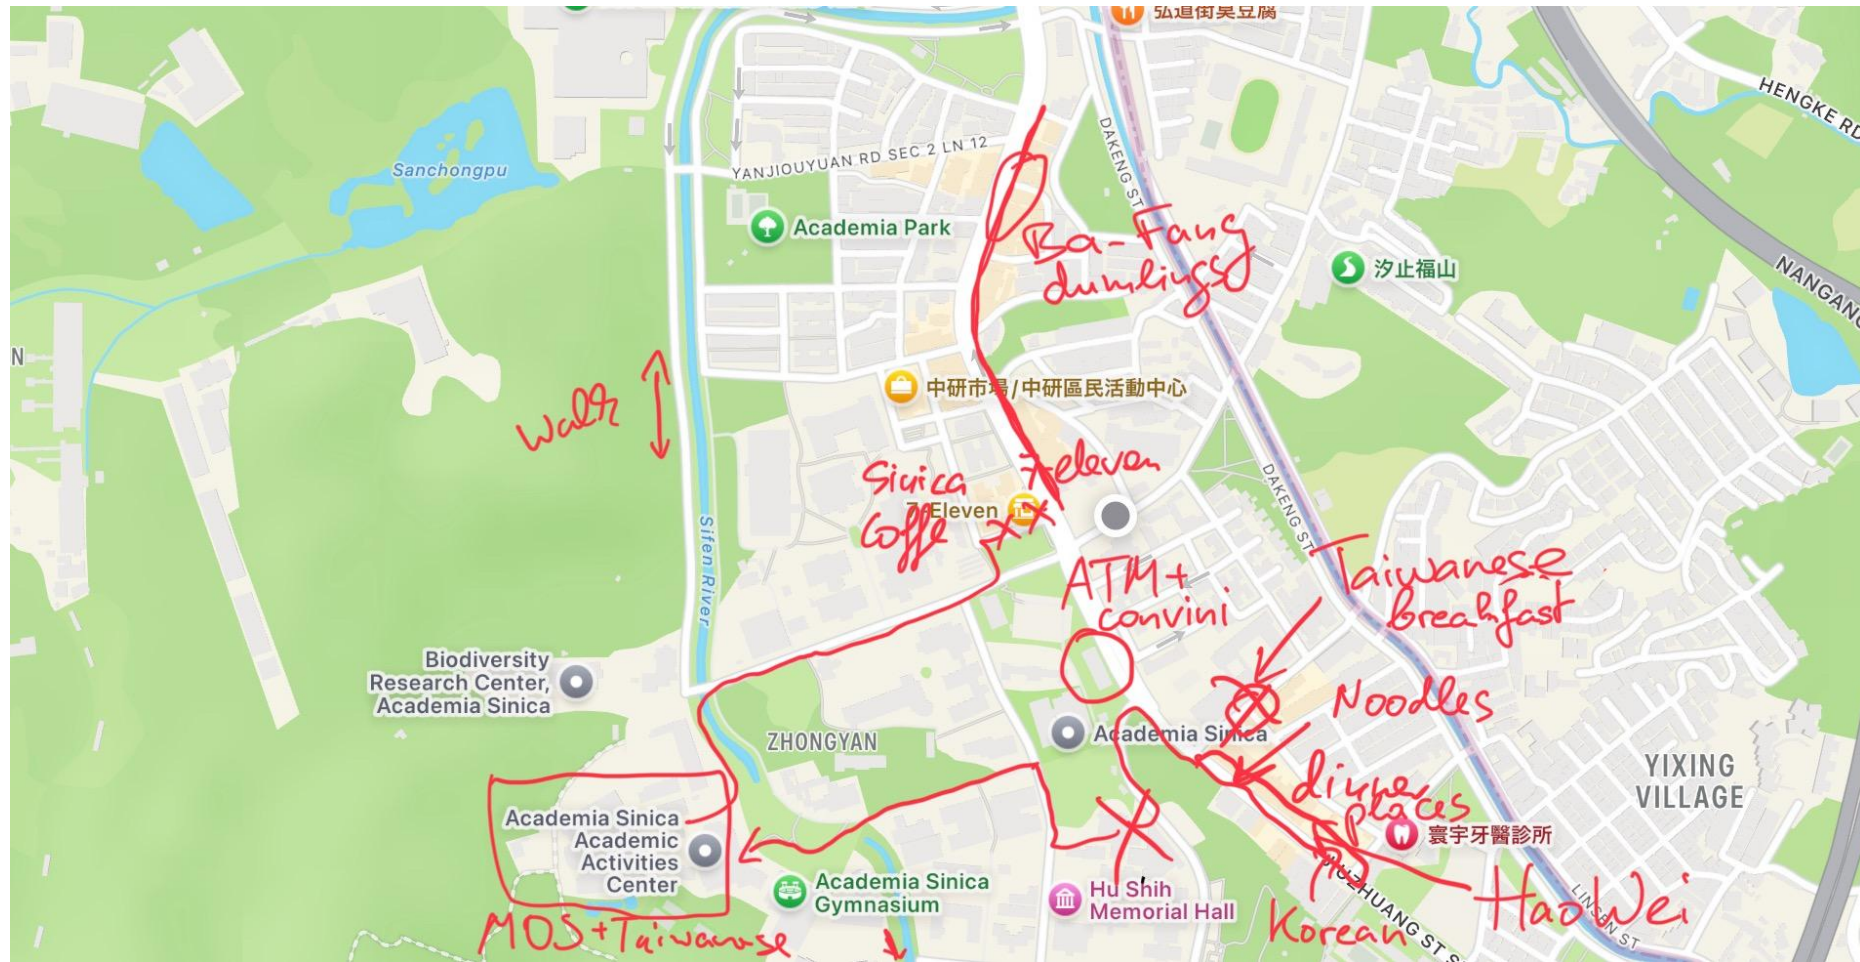

Anatoli Fedynitch

Goals

1. Focus on **discussion** and more advanced topics compared to previous workshops → speak up, ask questions
2. From previous TAML workshops, everything needed to apply machine learning by yourself → reinforce your knowledge about how to prepare data or simulation for training
3. After Francesca's talk in spring 2025, Kozo developed a powerful data analysis method. He will teach it on Thursday + Friday
4. Ivan will teach a more advanced technique about how to improve the ML accuracy with real data

Practical info - food

Transportation and other matters

1. Use google maps
2. U-bike needs a Taiwanese phone number for registration
3. Talk to the organizers:
 1. Stefan Fröse!
 2. Anatoli
 3. Cindy

Workshop dinner

1. We will go for typical Taiwanese food in an old-school/traditional place nearby (磚窯古早料理南港創始店)
2. You need to form groups and organize yourself to reach it by public transport
3. Use [google maps](#)
4. Will be plenty of food, so stay hungry
5. **TIME IS THURSDAY (tomorrow) AT 7PM, meet there!**

Super important

1. Ask questions!
2. **We don't have to stick very precisely to the timetable and can accommodate additional slots in the program.**
3. Remember that you're talking to your collaborators → **be open about problems.**
4. Feel free to ask about **how to apply method XYZ to YOUR specific problem**
5. **On Friday,** we will wrap up and compose a list of joint issues must be solved for advancing our science

Enjoy the time here in Taiwan!
