

Center for High-Energy and High-Field Physics (CHiP)

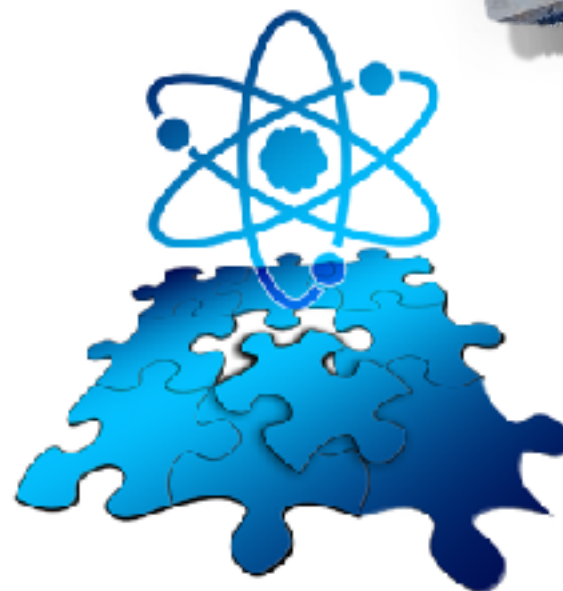

About CHiP

- CHiP was first funded in 2018 based on the first phase of the Higher Education Sprout Project by the Ministry of Education
- The phase-1 ended at the end of 2022
- Phase-2 started in 2023
 - Passed the phase-2 mid-term review this year

Missions

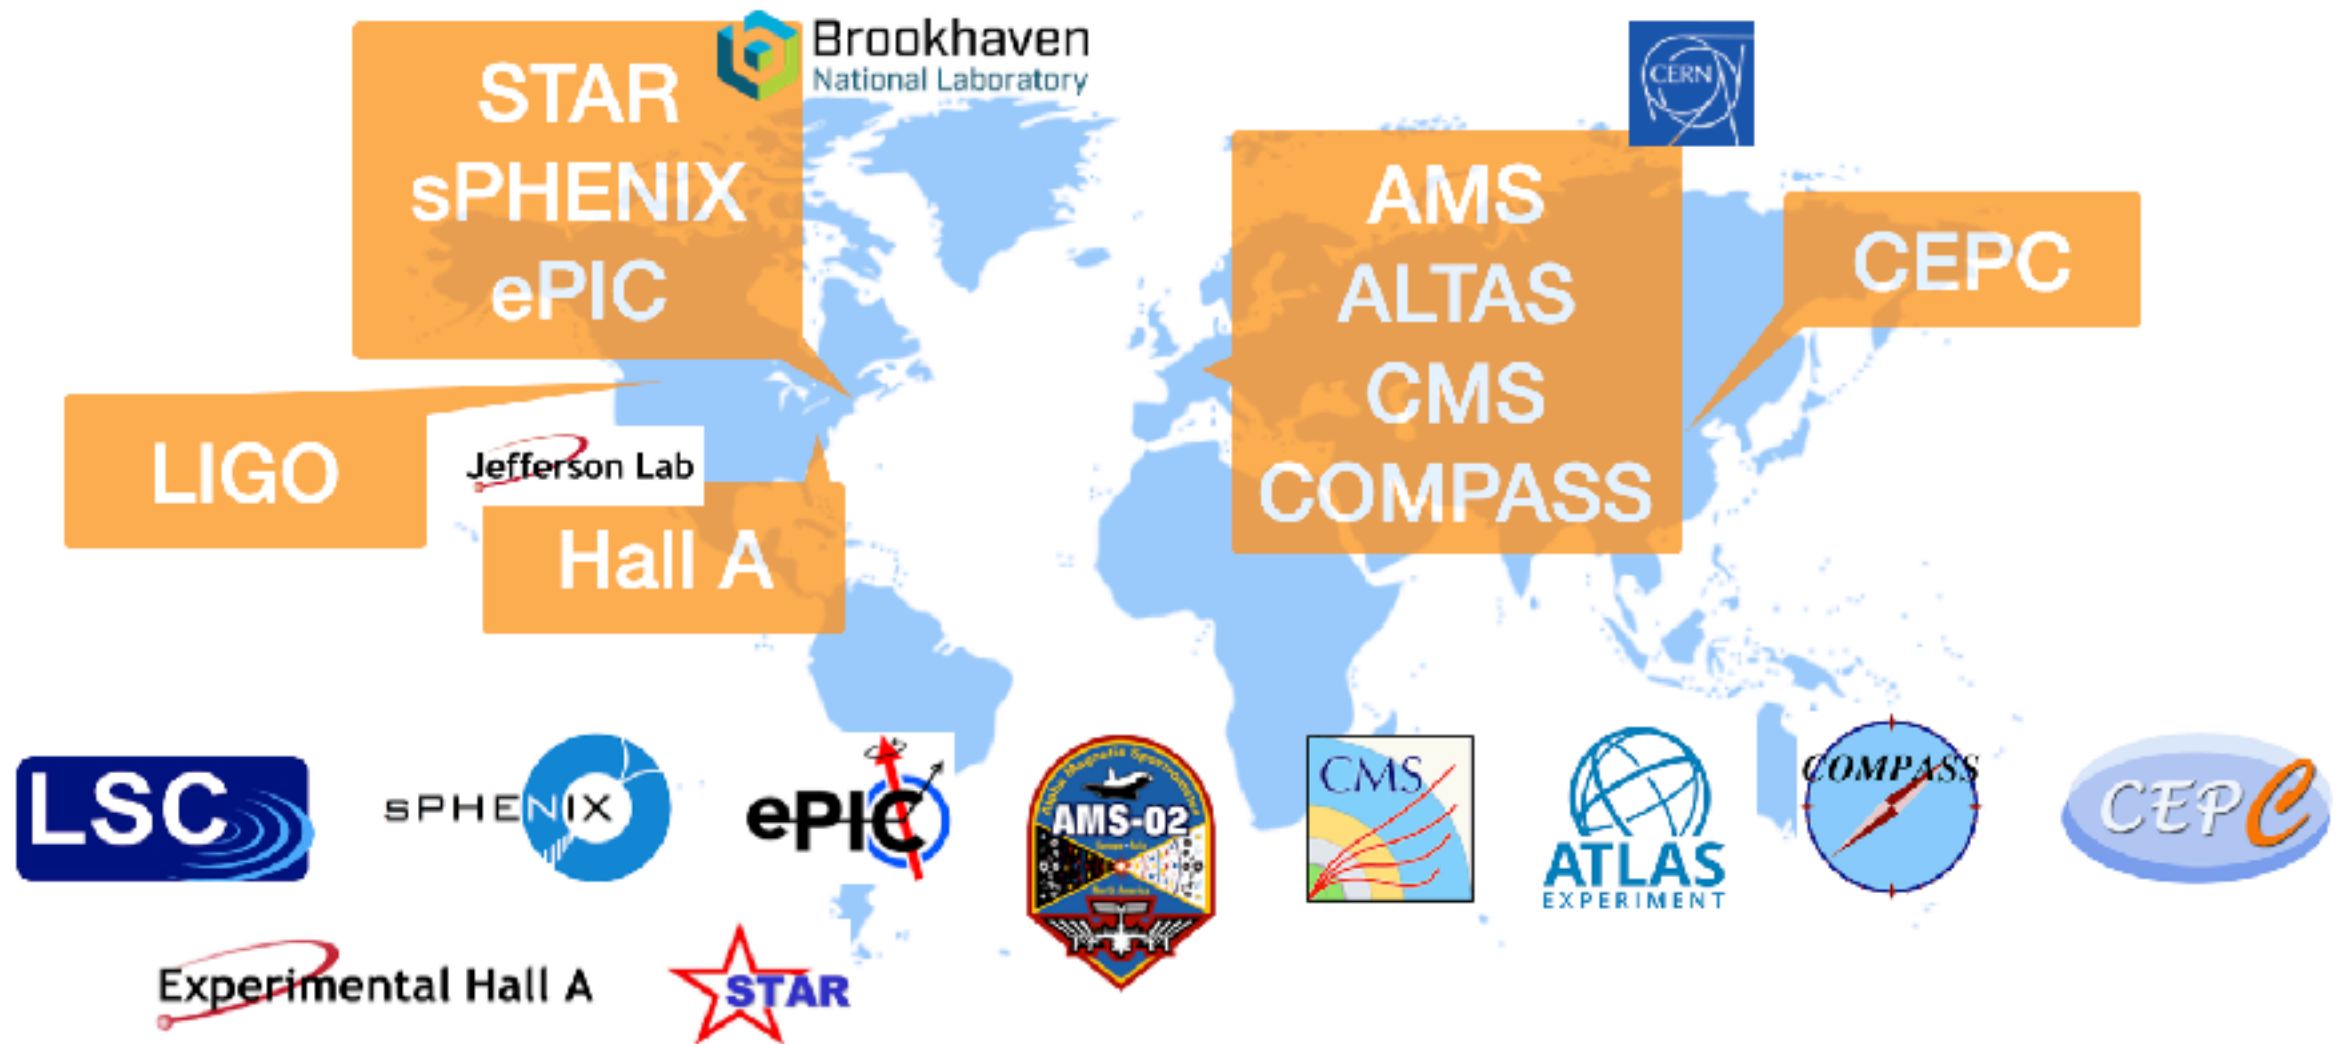

- Scientific goal: frontier physics research, focus on a few key physics questions to understand the fundamental structure of matter and the origin and evolution of the Universe
- Advanced experimental technologies
- Collaborate with industrials
- Cultivate talents
- Social responsibilities

Structure of the CHiP

International Collaborations

SIMONS
OBSERVATORY

We hope to join the Simons Observatory to kick off the experimental cosmology at CHiP soon!
