The 13th Circum-Pan-Pacific Symposium on High Energy Spin Physics

OCTOBER 27–30 Academia Sinica Taipei, Taiwan

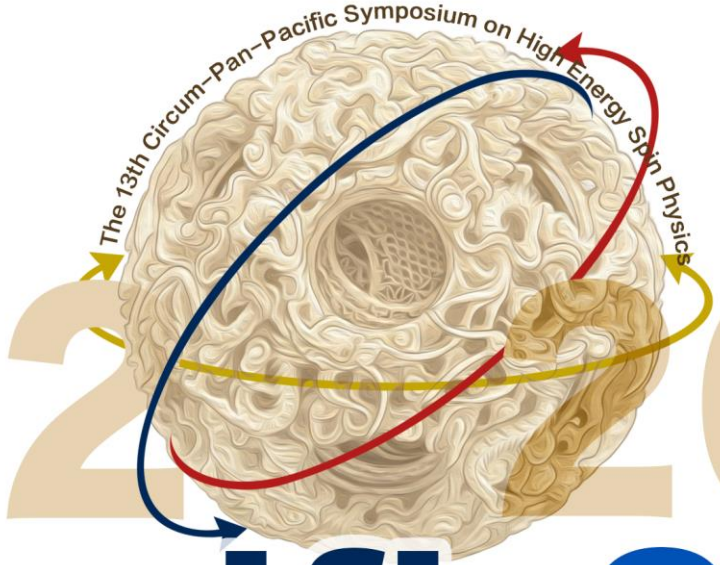

2026 PacificSPIN

The Circum-Pan-Pacific Symposium on High Energy Spin Physics (PacificSPIN) series was originally established to promote research in hadronic spin physics, with a particular focus on the partonic spin structure of the nucleon. Over the years, its scientific scope has expanded to encompass intriguing topics of spin polarization phenomena in heavy-ion collisions. Symposia in this series were held in Hefei (2024), Miyazaki (2019), Taipei (2015), Ji'nan (2013), Cairns (2011), Yamagata (2009), Vancouver (2007), Tokyo (2005), Washington (2003), Beijing (2001), Wako (1999), and Kobe (1996). The symposium also serves as a platform to strengthen collaboration and communication among physicists from the Circum-Pan-Pacific region and beyond, while providing valuable opportunities for young researchers to present their work.

— host coordination and PacificSPIN liaison
Jun-Young Kim
— scientific program, invitations and budget
Hyeondong Son
— local organizing team

This will be the first PacificSPIN series held in Korea!

Thank you for participation and see you in PacificSPIN 2028 at Incheon, Korea!
