[QMPS2024-TOTS] 2024 Quantum Materials Physics Symposium on Transport and Optics in Topological Systems (QMP-TOTS 2024)

Wednesday, June 12, 2024 - Friday, June 14, 2024

Institute of Physics, Academia Sinica

Scientific Program

The scientific program of the TOTS 2024 Workshop will take place from 9 am on June 12th (Wednesday) to 12 pm on June 14th (Friday), followed by a half-day excursion in the Friday afternoon.

The scientific program includes the following sessions:
Nonlinear optics
Nonlinear and nonreciprocal transport effects
Magnetic topological systems
Superconducting diode effect and strongly correlated systems

The TOTS 2024 Workshop aims to reduce paper consumption; therefore, printed abstracts will not be distributed onsite. Please download the detailed program and abstracts for both oral and poster presentations from the following link:
Download TOTS 2024 Program Book Here.
The password for accessing the PDF file will be sent to participants via email.

A short timetable for a quick overview can be found at this link (no password required).
