Dear Wen-Chen,

Here I'm sending you the program for VM photoproduction. It includes 5 files as follows.

vmg.f (t-dependence, e.g., diff. cross section and polarization obs.)
vmg.dat (input file for vmg.f)
vmpcs.f (total cross section)
vmpcs.dat (input file for vmpcs.f)
readme.input (explanation on the input files)

Please think about how we can improve it for your purpose.

Best Regards,

=====

Yongseok OH
Institute of Physics, Academia Sinica

NCU workshop on EIC physics and detectors

📅 9 Dec 2022, 08:20 → 10 Dec 2022, 18:30 Asia/Taipei

📍 Department of Physics, National Central University

👤 Chia-Ming Kuo (NCU) , Jen-Chieh Peng (UIUC/NCU) , Wen-Chen Chang (AS)

Pomeron-exchange

Model I

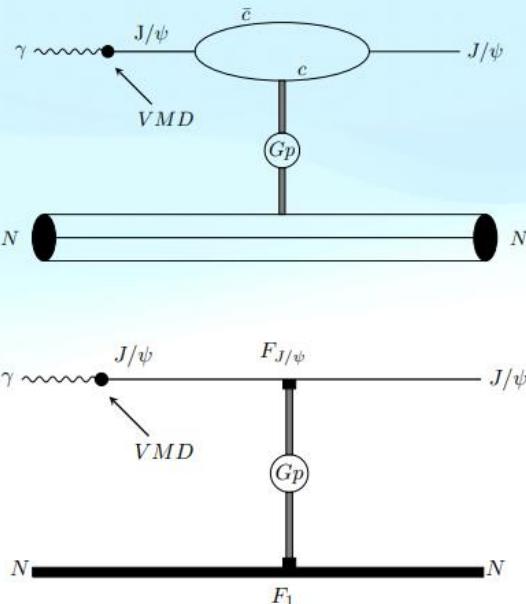

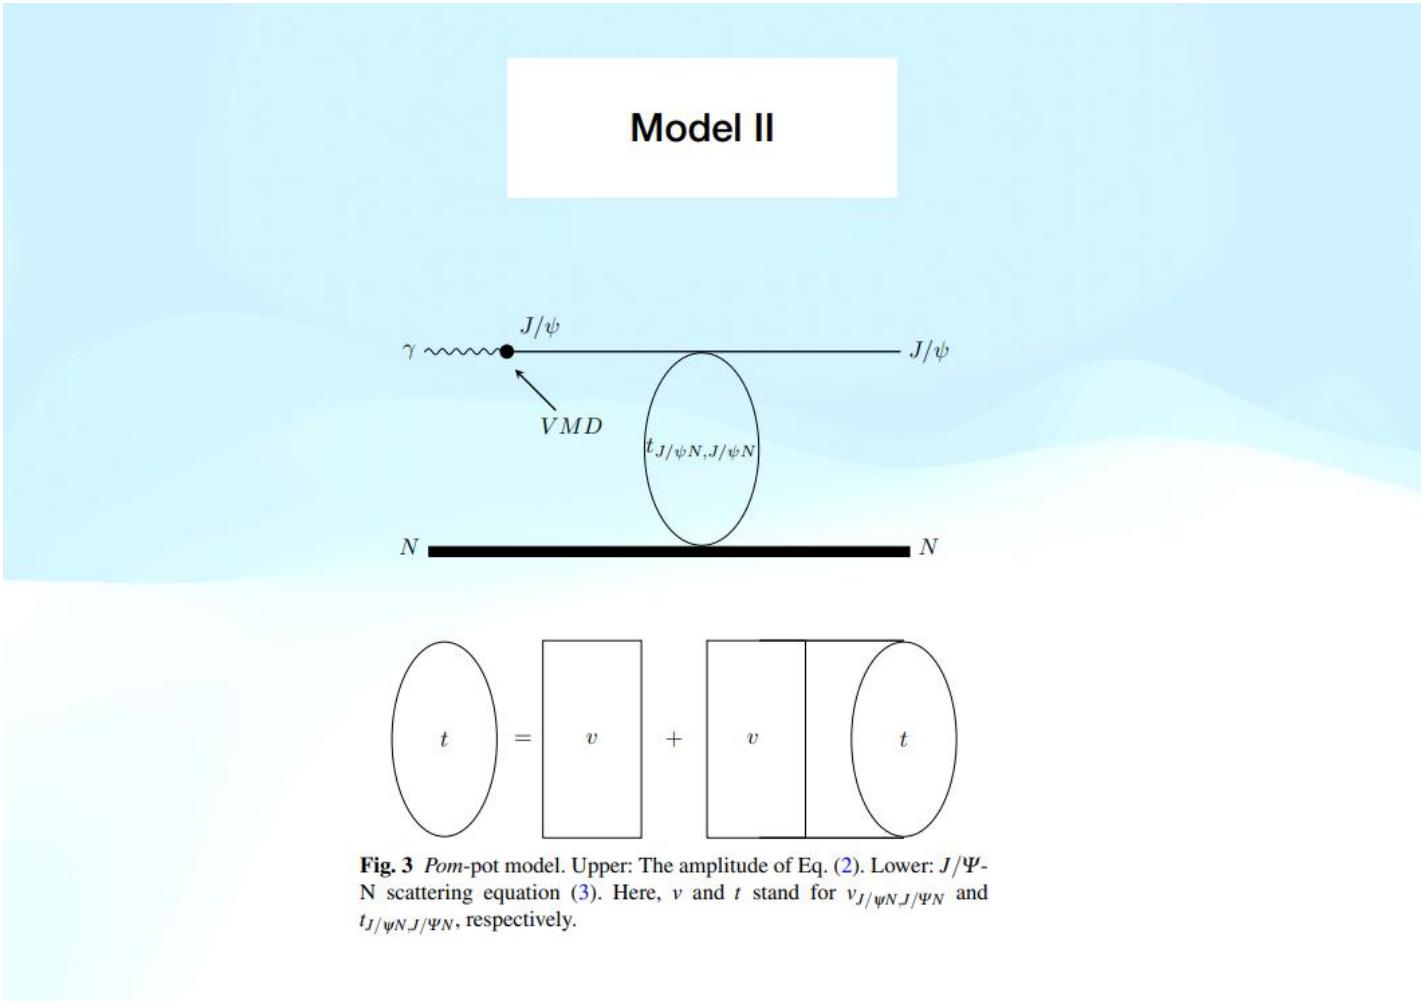

Fig. 2 Pomeron-exchange model of Donnachie and Landshoff (*Pom-DL*). Upper: Pomeron-exchange between quarks in J/Ψ and nucleon, Lower: Pomeron-exchange amplitude Eq. (1) resulted from assuming the Pomeron-photon analogy and using the factorization approximation.

Pomeron-potential

GPD-based

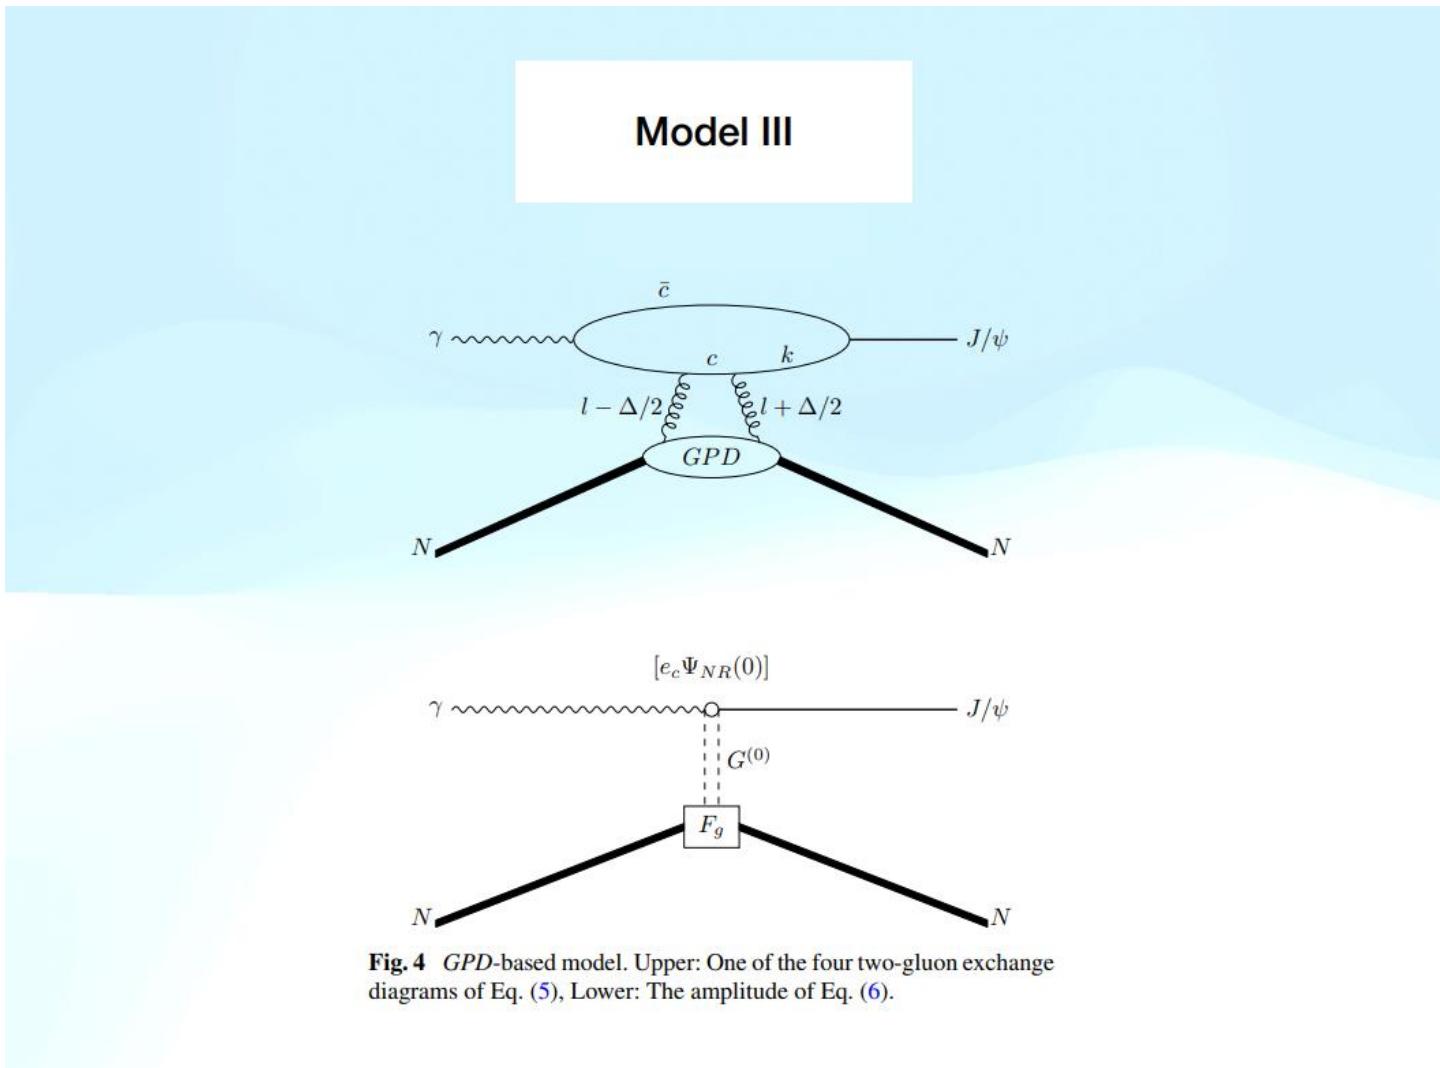

Fig. 4 GPD-based model. Upper: One of the four two-gluon exchange diagrams of Eq. (5), Lower: The amplitude of Eq. (6).

Holographic model

Model IV

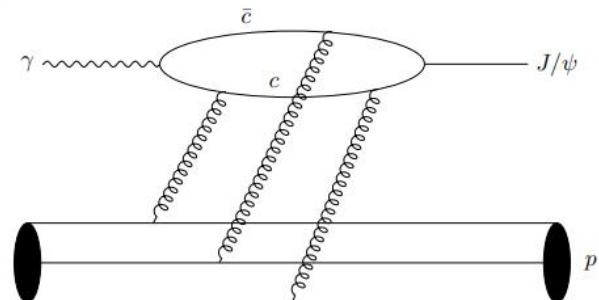

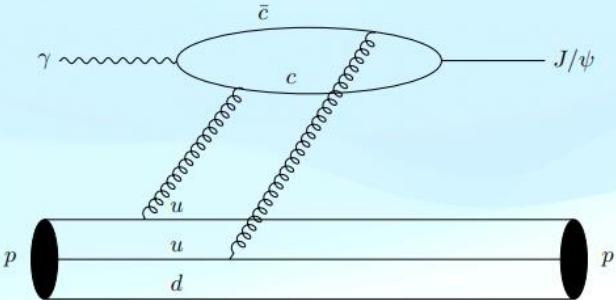

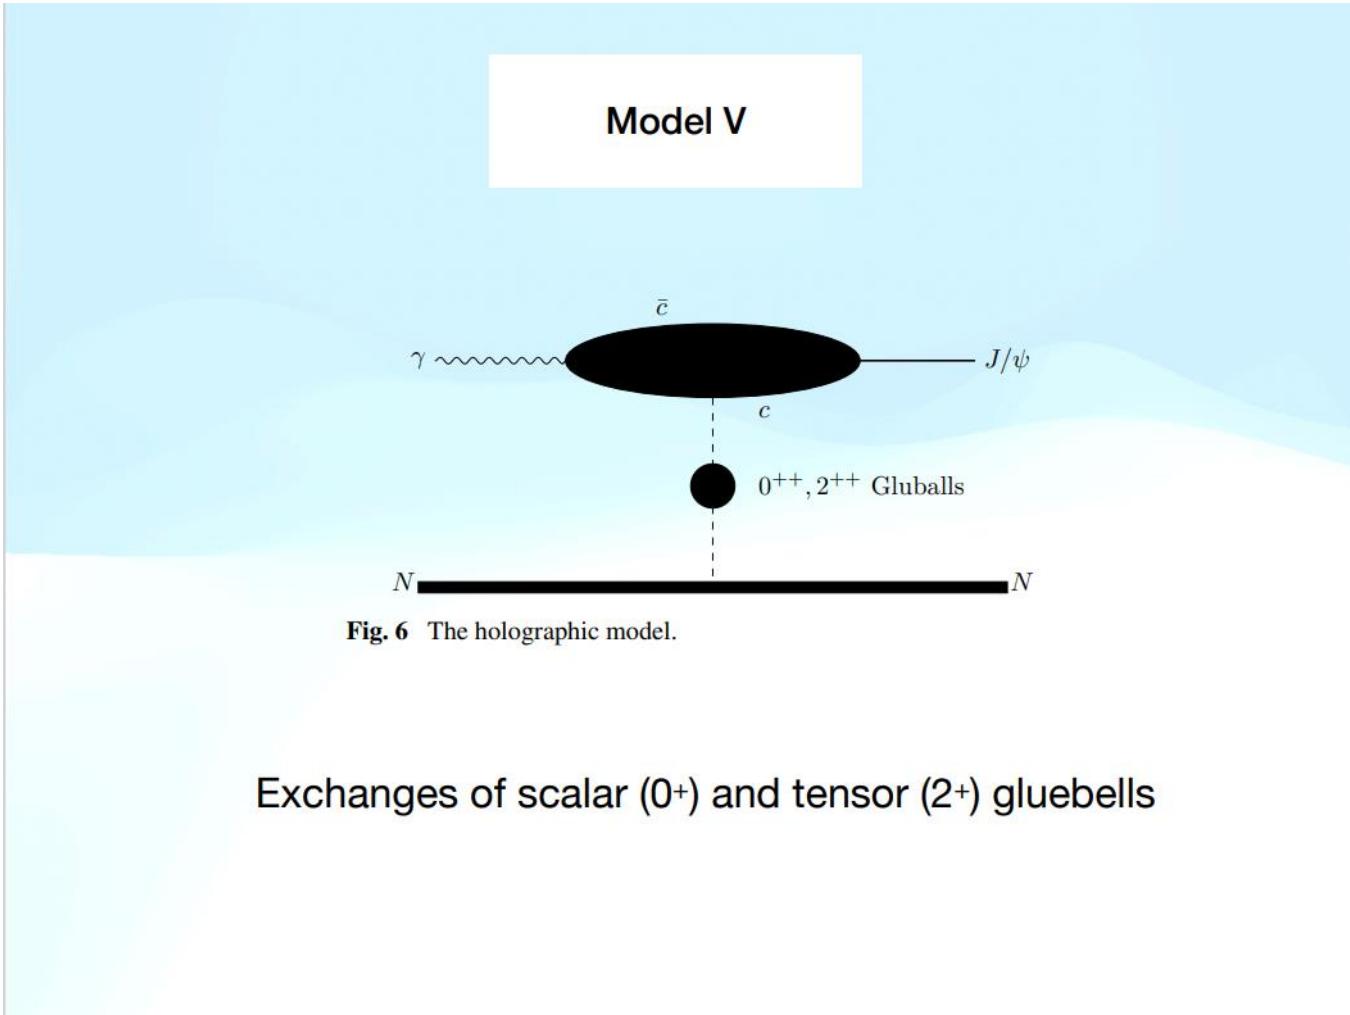

Fig. 5 The $2g + 3g$ model. Upper: two-gluon exchange, Lower: three-gluon exchange.

Scalar and Tensor Glueballs Exchange

ccbar-loop

Model VI

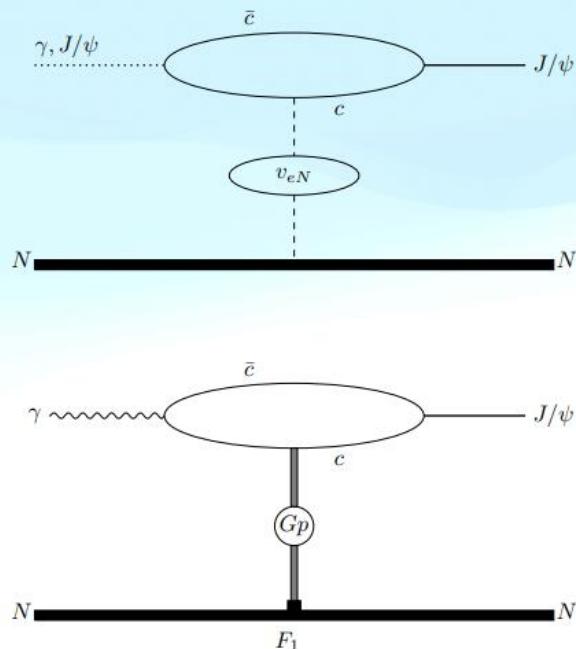

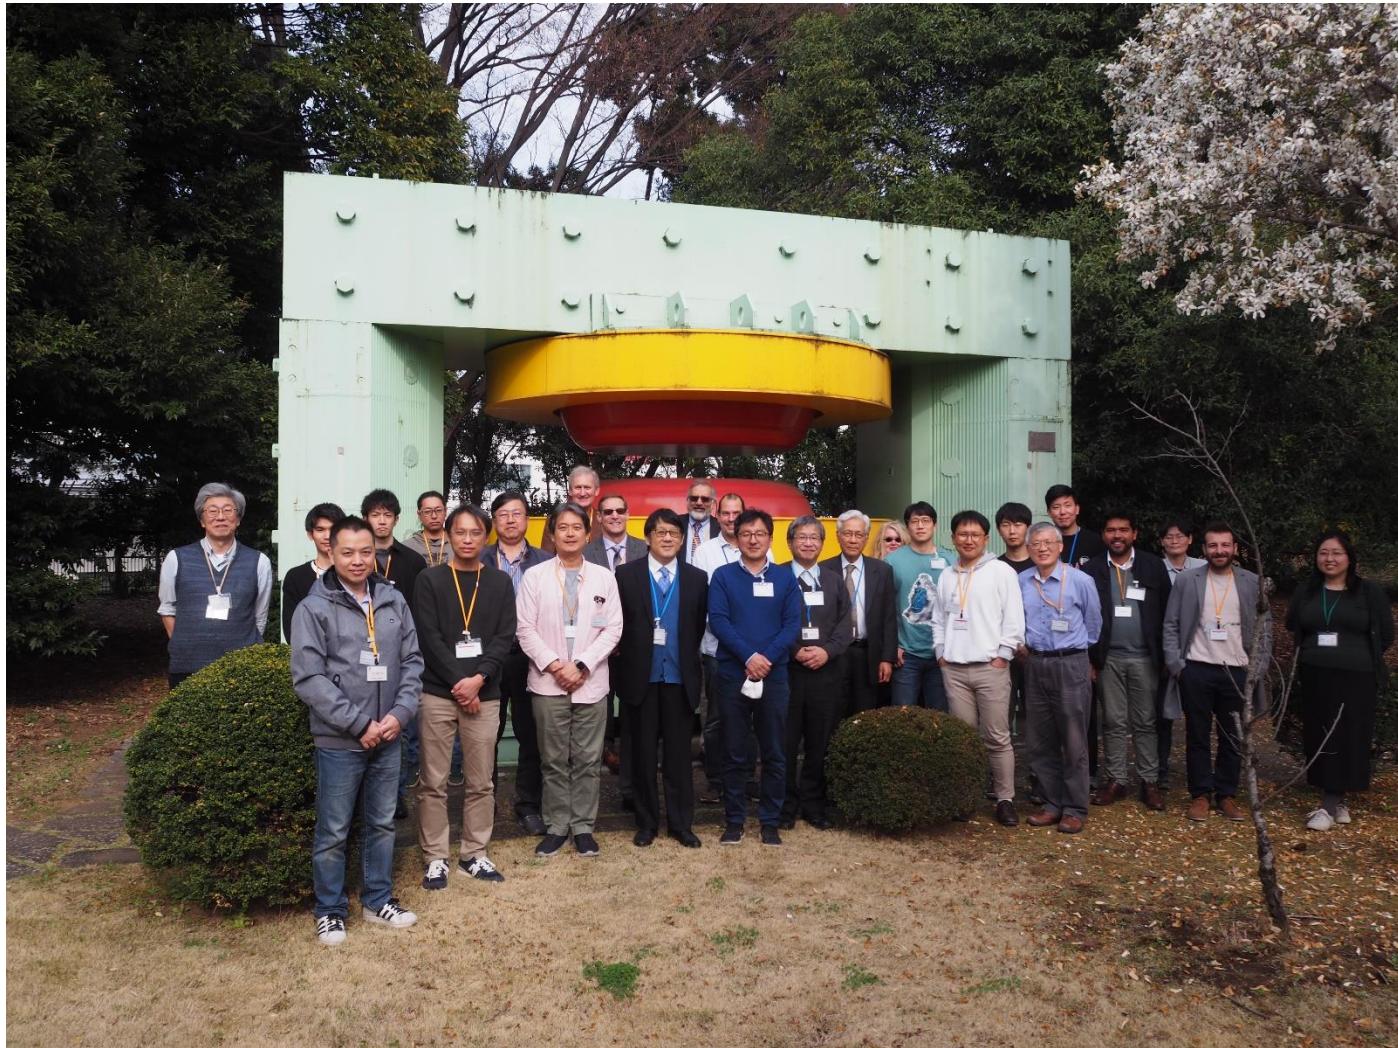

Fig. 7 Models with $c\bar{c}$ -loop mechanisms. Upper: calculated from quark-nucleon potential (v_{cN}), Lower: calculated from Pomeron-exchange mechanism.

EIC Asia Workshop

📅 16 Mar 2023, 07:00 → 18 Mar 2023, 13:30 Asia/Tokyo

📍 Okochi-hall (Bldg C32) (RIKEN)

👤 Ralf Seidl (RIKEN) , Taku Gunji (Center for Nuclear Study, the University of Tokyo) , Yuji Goto (RIKEN)

Electron-Ion Collider Resource Review Board (RRB) Meeting

Apr 3, 2023, 8:00 AM → Apr 4, 2023, 5:00 PM us/Eastern
